【Abstract】 With establishing the system of the standardization training of resident physicians in China, the educators suggested that the combination training mode of the professional degree postgraduates and the standardization training of resident physicians should be established for training the postgraduates of clinical science of stomatology in the new round of oral medical education reform. This paper analyzed the necessity of clinical training and the problem of the scientific research ability training. Additionally, we provided the plan to resolve the above problems.

【Key word】 Clinical Science of Stomatology for the postgraduates training Standardization training of resident physicians Combination training mode Scientific research ability training

面对社会对高级临床口腔医学人才的需求,2000年建立了口腔临床医学专业学位研究生教育制度,其侧重从事临床口腔医学实际临床动手能力,以培养高级临床口腔医师为目标,突出临床应用和强调解决临床实际问题,加强临床口腔疾

病治疗能力的培养和考核,开辟了一条培养应用型口腔医学人才的新途径^[1]。另外,卫生主管部门出台的住院医师规范化培训制度为提高医学生的临床能力,培养高层次医疗卫生人才提供了制度保障^[2]。虽然两者在报考条件、临床能力测试内容及考核要求等方面有些差异,但其培养目标是统一的,提高口腔医学生的临床应用能力和实践
